

Minutes of ISSA Meeting

June 6, 2014

Welcome

16 members

Ron Shuck

Round Table Discussion

How technology controls our lives today...

How different technology is today than when we were kids...

OpenSSL Vulnerability - there is some discussion in the open forum about a "PATCH" Tuesday.

How much time did your company give to Heartbleed vulnerability?

Most said they patched all external facing systems, but not much time given to internal.

FBI Cybersecurity Workshop at NCAT on June 10th & 11th

What is FBI's motivation in putting on workshop?

Topics look good for security professionals.

NIST Cybersecurity Framework

Take a look at it...

FDIC - new handbook coming out in about a month...

Target Security Breach - Good example of how to communicate...

Do not let your security geek speak for the company.

Security and Compliance - there is a difference.

Audits should be a team effort.

Should be seen as an opportunity to discover unknown vulnerability and fix.

Simply Stated for malware - security awareness

Ron asked for ideas on topics for ISSA meeting.

David Orr volunteered to do presentation on RSA at next meeting.

After the assessment, how do you manage the vulnerability? A topic most wanted to hear more about...

Ron listed a number of topics that he will push out to the team to vote on for subsequent meetings.

July meeting cancelled due to landing on 4th; next meeting at the library on Aug 1st.

Meeting: Rockwell Branch Public Library, 1:00 till 3:00
